

Mazen Touati

Backend Software Engineer

| | | <https://sunchayn.github.io>

Experience

Senior Back-end developer II, full-time at Studocu
January 2024 - Present / Netherlands

~

- ▶ Actively working to fix database scaling issues by writing detailed plans, analyzing different options, and optimizing queries.
- ▶ Established a technical roadmap for maintaining the user's state during NextJs migration, allowing the old and new systems to work together.
- ▶ Leading backend developers interviews, occasionally co-hosting system design interviews for Engineering Manager candidates.
- ▶ Improving collaboration with frontend developers within team and non-technical co-workers such as SEO and Marketing.

Senior Back-end developer, full-time at Studocu
July 2022 - December 2023 / Netherlands

~

- ▶ Contributed to the foundation of REST API migration.
- ▶ Built and maintained monitoring dashboards using OpenSearch, Metabase, and Grafana.
- ▶ Onboarded new team members through the Buddy System.
- ▶ Wrote clear and simple technical documentation and diagrams to explain complex systems.
- ▶ Contributed to developer relations by writing technical blog articles.
- ▶ Set up Playwright foundations for data seeding and auto-generated intellisense to share information between tests and the backend.
- ▶ Organized and reduced technical debt, by refactoring core components like the authentication flow.
- ▶ Created technical RFCs for architectural changes and projects like Rector and Cacheable Entities (now a Laravel package).
- ▶ Co-hosted technical interviews for backend developers.

Medior Back-end developer, full-time at Studocu
September 2021 - June 2022 / Netherlands

~

- ▶ Completed the migration from Elasticsearch to Algolia.
- ▶ Improved test coverage by adding missing tests and refactoring legacy code for better maintainability and testability.
- ▶ Accelerated the mobile app relaunch (SDUI) by adding missing features and setting up a testing foundation on short notice.
- ▶ Laid the groundwork for the high-school project.
- ▶ Participated in the recruitment process by evaluating technical assignments and shadowing interviews.

Honest,
Innovative &
Minimalistic individual.

Notable Side Projects

Monetize.js (1st prize winner*)
May 2020

An event-driven library to manage and simulate Web Monetization.
*Won Grant for the Web Hackathon.

Education

Master in Media Engineering
2017 - 2019

University of Manouba

Bachelors of Computer Sciences
2014 - 2017

University of Manouba

Communication

English Arabic

Advanced Native speaker

Skills

I am skilled at

- PHP and SQL.
- Frameworks: Laravel.
- Testing: PHPUnit, TDD.

I currently use these tools

OpenAPI, AWS, Docker, Algolia, Grafana, Metabase, Mixpanel, PagerDuty, and OpenSearch.

I used to be skilled at

JavaScript, VueJS, CSS, and SASS.

I had little/outdated XP with

React, Slim, Symfony 3, and Android using Kotlin, Vonage, Stripe, and Twilio.

I'm interested in learning

- Ruby On Rails
- GoLang

[\(...\)](#)

Back-end developer, part-time (remote) at ALINAOUS

Jan 2021 - June 2021 / Tunisia

~

- Maintained a REST API while adding new features occasionally.

Full-stack & Mobile developer, full-time at ALINAOUS

June 2019 - December 2020 / Tunisia

~

- Designed and built a REST API for electric-bikes rental service using: Laravel, Stripe, and Vonage. My contribution reduced the client's expenses and increased the overall performance.

- Developed interactive service dashboard using Laravel, Tailwind CSS, and VueJs.

- Created performant static websites using modern tooling.

Full-stack developer, freelance

Jul 2017 - Dec 2019 / Tunisia

~

- Maintained and optimized PHP legacy projects.
- Developed and deployed fully-fledged websites using Laravel and VueJs.
